

DX2000 from NEC lets you put big data to work

with quick analysis in a robust, space-efficient, and
scalable solution, powered by Intel®

Powered by
the Intel Xeon®
processor D
product family

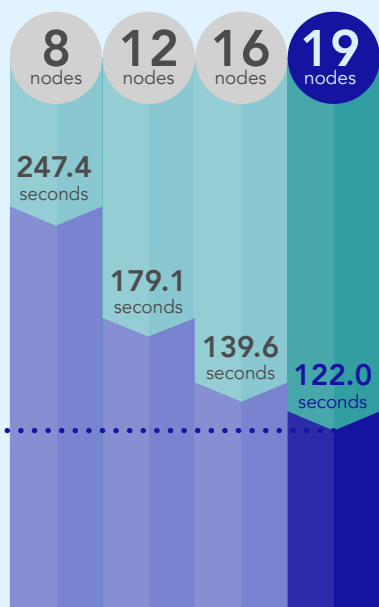

44
customizable slots
in just
3U
means resource
flexibility

The modular NEC
enclosure delivered
**BIG DATA
PERFORMANCE
and
COMPUTE
DENSITY**

This compact
design provided
**IN-MEMORY
CAPABILITIES**
to speed up critical
data analysis

Cut analysis
time in half
by adding
server nodes.....

Process **100 GB*** in

*That's a sample data set big enough to store
demographic data for 6.75 billion people¹
